

*Join an Ecology
field course in
the Arctic!*

Arctic Field Ecology

A summer course for undergraduate and graduate
credit through the University of Minnesota

supported by

The Itasca Field Biology Program, University of Minnesota
The International Institute of Tropical Forestry
The National Science Foundation

Summer 2002: June 25-July 21. Exploring the Arctic from treeline to the ocean. Travel over the Brooks Range and by kayak along the boundary of the Arctic National Wildlife Refuge. Examine Arctic natural history and ecology in conjunction with scientists involved in the NSF funded study **Biocomplexity associated with biogeochemical cycles in arctic frost-boil ecosystems.**

Find out more about the course by visiting the web site at <http://muskox.com>.
